# Minolist, Minomuk, Minomoc, Minotec, Minomet - measuring capsule meter with radio module

## LoRaWAN® or wireless M-Bus interface

The ZENNER flush-mounted meters are coaxial measuring capsule water meters with rotatable register. The meters can be used both in the initial equipment as well as the exchange outstanding. The current connection dimension allows for use in both flush-mounted connection interfaces as well as in surface-mounted fittings. The insert is intended for the vertical installation position, for the connection interfaces according to DIN EN ISO 4064.

All types have a 7-digit roller register with modulator disc and are equipped ex works with a LoRaWAN® or wireless M-Bus radio module and can be integrated into LoRaWAN® or wireless M-Bus readout systems.

All materials, which are used in the drinking water section, comply with the required standards, guidelines and the current German drinking water approval (other country specific drinking water approvals on request).

## Performance characteristics in overview

- Multi-jet dry dial meter with protected magnetic coupling
- With 7-digit-rollers register and modulator disc (1 l/pulse) for non-reactive scanning for radio
- For vertical installation
- Register cap made of high-quality UV-resistant polymer plastic
- Battery life 10 years after radio activation
- Register rotatable 360 °
- Operating pressure MAP 10
- Approved according to MID

## Applications

- For the consumption measurement of cold and clean drinking water or service water up to 30 °C
- For the consumption measurement of hot and clean drinking water or service water up to 90 °C

Picture similar

## AMR options

- Equipped with a radio module as standard:
  - LPWAN radio module (868 MHz) for LoRaWAN®
  - wireless M-Bus radio module (868 MHz) with C1 mode

## Smart Metering functions

- Self monitoring
- Tampering detection
- Reverse water flow detection
- Leakage detection
- Meter stop detection
- Meter oversized detection
- Meter undersized respectively pipe burst detection

## Minolist, Minomuk, Minomoc, Minotec, Minomet with LoRaWAN® interface

### Technical data LoRaWAN® radio module

Operating frequency	868 MHz
Transmission power	max. 25 mW
Duration of transmission telegrams	up to 1.5 s (depending on spreading factor)
Sending interval	Standard: daily (monthly or 8 telegrams per day, each with the last 3 hourly values on request)
Data transmission procedure	LoRaWAN® class A (bi-directional communication)
Encryption of radio protocols	yes
Error detection	CRC
Telegram content	Telegram contents depend on the communication scenario. Contents can be, for example: Daily-, monthly, half-monthly value, key date, date, time, status information (alarms), firmware version, identification number
Optical interface	yes
Energy supply	Lithium battery
Battery life	10 years + reserve (scenario 201 and 202), 6 years + reserve (scenario 203)
Battery status monitoring	yes
Display	no
Reverse flow detection	yes
Protection class	IP67
Ambient conditions	+5 °C to +55 °C
CE conformity	according to directive 2014/53/EU (RED)
Radio activation (compact device with radio module ex works)	<ul style="list-style-type: none"> <li>- by means of illuminating the IR interface &gt; 8 s (illuminant should not be an LED);</li> <li>- by means of the ZENNER opto-head, the universal interface MinoConnect (USB or Bluetooth) and the MSS-configuration software or the ZENNER Device Manager Basic app;</li> <li>- Autostart after flow rate of 100 L from firmware 1.41 possible</li> </ul>

### Datalogger (readable via optical IrDA interface) IrDA-Interface

Annual due date values	max. 2
Monthly values	18 plus 18 half-monthly values
Daily values	32

## Minolist, Minomuk, Minomoc, Minotec, Minomet with wireless M-Bus interface

### Technical data wireless M-Bus-radio module

Operating frequency	868 MHz
Transmission power	max. 25 mW
Duration of transmission telegrams	approx. 10-15 ms
Sending interval *	180 seconds (standard), others on request
Data transmission procedure	wireless M-Bus (standard: C1 mode) from firmware 1.78: C1 or T1 depending on scenario
Encryption of radio protocols	yes (Standard: Encryption Mode 5; Encryption Mode 7 on request)
Error detection	CRC
Telegram content	Telegram contents depend on the communication scenario. Contents can be, for example: Serial number, date, meter reading, mid-month value, previous month (max. 15), status information radio module
Optical interface	yes
Energy supply	Lithium battery
Battery life	up to 10 years plus reserve from radio activation, depending on scenario
Battery status monitoring	yes
Display	no
Reverse flow detection	yes
Protection class	IP67
Ambient conditions	+5 °C to +55 °C
CE conformity	according to directive 2014/53/EU (RED)
Radio activation (compact device with radio module ex works)	The activation of the radio and the coil scanning of the module can be carried out: - by means of illuminating the IR interface > 8 s (illuminant should not be an LED); - by means of the ZENNER opto-head, the universal interface MinoConnect (USB or Bluetooth) and the MSS-configuration software or the ZENNER Device Manager Basic app; - Autostart after flow rate of 100 L from firmware 1.41 possible

\*After activation, the module transmits for a period of one hour with a quicker transmission interval of 20 s (commissioning scenario).

### Datalogger (readable via optical IrDA interface)

Annual due date values	max. 2
Monthly values	18 plus 18 half-monthly values
Daily values	32
